Description:

Tucson, Arizona: Astrophysicist Drew Ramsay's legs are crushed but not his spirit despite a swarm of rampaging energy domes ravaging the surface of planet Earth. Millions are dead and his failed anti-gravity experiment may be the cause. With the help of his devoted foster brother, Lucas, the Ramsay brothers scramble to devise an ingenious plan to stop the annihilation of the human race, but soon learn that they've been unwittingly maneuvered into the middle of a much larger saga--one where reality is measured on a sliding scale. Nothing is as it appears to be, challenging their faith in

science and each other. Will they live long enough to deploy their plan and save humanity, or will they surrender to certain death along with everyone else?
